What is **RUDI?**

RUDI provides responsible AI training, implementation support, and workforce development programs. We've spent three years developing a comprehensive competency framework specifically for generative AI and its real-world applications.

100+ Hours of Developed Curriculum

Comprehensive content library covering AI fundamentals, practical applications, and leadership strategy

Modular & Customizable Delivery

Flexible training sessions (3-6 hours) that fit your schedule and organizational needs

Progressive Certification Pathways

Three levels: AI Literacy → Applied GenAI → AI Leadership, each building on the previous

Generative AI Technology Focus

Hands-on experience with ChatGPT, Claude, Gemini, and enterprise AI tools relevant to your industry

Competency-Based Framework

3-dimensional assessment model: Conceptual understanding, Operational skills, Governance & ethics

Industry-Specific Customization

Tailored use cases and examples for education, manufacturing, healthcare, professional services, and more

RUDI: Responsible Use of Digital Intelligence
